

Online Tournament Services inclusive APP and Responsive Design

Everything about the tournament ://online on your club website

You don't have to perform the same task twice, once you've decided to use the PC CADDIE://online tournament bookings. The real-time application is a reality. All applications are automatically registered in the tournament. A photo and the small text can be transmitted without any programming knowledge at your website, after the tournament. The online course information is updated automatically, and you can add as many details as you wish (for example, regarding the aerifying of the green areas). This module is highly valued by members and guests, and enriches your website service.

App and Responsive Design - optimize your customers' booking behavior

With the PC CADDIE://online App and its responsive design your customers can comfortably book all the required online services for tournaments via mobile phone, pad or tablet, in the appropriate resolution. Downloading the appointments in the private Outlook calendar is included. The App offers dedicated operator access with tournament functions that go far beyond a classic overview of seats, for your marshals and starters. Please feel free to test it!

Facts

Benefits:

- Online tournament management with entry lists, start and result lists, tournament reports, photos, sponsor logo
- „Complete Version“: Competition calendar, registration and deregistration via website, HCP master data query, 1: 1 in real time including e-mail confirmation
